My major area is backend development. Also I would develop a frontend when I am a full-stack developer. A few jobs involved developing a web based system with Laravel <a MVC Framework>. In my current job at a Co-Dining Platform. I have worked on the front-end, back-end part. At the beginning, I was asked to build a big system for user order bento and pick-up it on a vending machine. I need to complete this system in 6 month. It was a challenge because I had never created a big system like this. I had experience with creating these systems in few of my previous jobs, so it was a great chance to show my skills.

EDUCATION

Coventry University (Delivered by VTC)

BSc (Hons) Multimedia Computing, 2015 - 2016

Institute of Vocational Education (Sha Tin)

Higher Diploma in Multimedia, 2013 - 2015

Institute of Vocational Education (Sha Tin)

Foundation Diploma (Level3) in Computing, 2012 - 2013
